Here is a great opportunity for our customers to buy first class, strictly A-1 stock at ½ catalogue prices. This is the time to plant, for the way prices are advancing on all commodities, when these trees come into bearing American fruit, beyond any question of doubt, will be at a premium.

It is well to note you can plant berries, currants and all kinds of small fruits and vegetables in the young orchard for the first ten or twelve years.

We would suggest ordering early for at such reasonable prices this stock will move fast.

Take your pen and fill in order blank today.
